## **DETAILED ACTION**

### ***Response to Amendment***

1. This action is in response to the amendment mailed July 10, 2003.

Claims 1-5 were canceled and claim 6 was added and is now pending.

### ***Claim Rejections – 35 USC § 102(a)***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claim 6 is rejected under 35 U.S.C. 102(a) as being anticipated by Cyr et al. (U.S. 6,138,913).

Cyr discloses a printed substrate which can be constructed from woven and non-woven fabrics (column 5, lines 38-46) where fluorescent ink is applied to the substrate by printing (column 6, lines 38-42). Cyr discloses the substrate can be a label (column 4, lines 27-31) where the substrate contains a coating (column 5, lines 57-61) and a coating on the back surface (column 6, lines 60-67). The reference discloses the coating is substantially opaque (column 9, lines 5-7) and reflects greater than 50%-90%

Art Unit: 1774

of visible and ultraviolet light (50% to 90% opaque). In instant claim 6, the phrase, '*for a care label*' is directed to intended use. A recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. In a claim drawn to a process of making, the intended use must result in a manipulative difference as compared to the prior art. See *In re Casey*, 152 USPQ 235 (CCPA 1967) and *In re Otto*, 136 USPQ 458, 459 (CCPA 1963).

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Veiga (U.S. 6,350,709) discloses a coated woven or non-woven fabric (abstract, column 5, lines 1-30; and figure 2). Additionally, McKinney et al. (U.S. 4,758,465) shows a fabric substrate with a base coat and top coat applied to surface, where the substrate is woven (column 3, lines 18-32) where the compositions of the layers may be of any desired color (or pigment) (column 5, lines 12-21) which is inclusive of fluorescent pigment.

### ***Response to Arguments***

5. Arguments of rejection made under 35 U.S.C. 102(b) as being anticipated by Andric et al. (U.S. 5,449,200) is moot based on grounds of new rejection.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
